Marketed and sold in China under the Mecalor brand, our pet care division offers lots of different models,each designed with a unique purpose and consumer in mind

About Pet Dryer

A Dryer is the most important purchase a groomer will make for their business. And there are 3 types of dryer available: blasters, finishing dryers and combination dryer/blaster. For the start up groomer,we recommend a combination machine, which will give you the best of both worlds, although most groomers find it more beneficial to have a blaster by the bath, keeping hair contained to the bathing area. For the established groomer,we would recommend a separate blaster and finishing dryer. Irrespective of which type of machine you go for, it is very important to have more than one dryer, in case one should breakdown. We have a wide range of dryers to suit every budget, as well as refurbished machines which are ideal as back ups.

Finishing Dryer

The ionic Fashionable stand dryer is essential for those who desire stylish modern looks and the latest industry technology . Powered by a durable aviation grade BLDC motor, it has variable power and air temperature to provide complete and unrestricted control . In addition, it supports the latest high density anion generator to condition hair and eliminate harmful static . Specifically designed for continuous professional use, an ideal appliance for any busy professional salon .

Can be teamed up with the Mecalor pet dryer to provide optimal drying time.
